[Forgot the password](#)

- Basic webpage and therefore scope for adding more to aesthetics.
- Slow navigation speed between the webpages.
- Scope for making the page lively by adding success highlights, exceptional work and user experiences stories.
- Scope for incorporating some level of interactivity by adding a virtual assistance tool.

BROKEN LINK!

- Broken link in the automated email.
“https://api.app.medalynx.com/”
- The automated email generated after account registration needs improved template.

WAITING FOR APPROVALS

- Are approvals absolutely necessary?
- Instead of waiting for approvals, we can have two factor authentication.
- When there are increased number of user registration per day there might be delay in the approvals which may lead to slowing of the process. Therefore, leading to unsatisfactory user experience.

Assay Schedule	This study defines 0 assay configurations	MANAGE ASSAY SCHEDULE
Demo Mode	Demo mode obscures practice IDs on many pages	DEMO MODE
Master Patient Index	Configure the Master Patient Index settings for this folder	MASTER PATIENT INDEX

Specimen Repository Settings

If our user population isn't strictly restricted to trained researchers and scientists, the glossary needs to be more descriptive and directional.
Maybe interactive navigation pop up tools?

PAGE 3

- How about we incorporate Tableau like features?
- Very basic charts with minimal interactivity.
- Scope for including more diversity in the visualization types.
